Criteria

Violet Syria Example The **Criteria** field is one of the most important components of a badge. It explains how the Earner has been recognized, i.e. on what basis the badge has been issued. Badge criteria have a direct impact on the perceived quality and value of the badge for both *Earners* and *Consumers*.

Criteria can recognize the Earner in terms of expertise, skills, achievements or other qualities. Some form of assessment is common and should be clearly described, including what types of evidence will be accepted to award the badge.

No maximum length. Recommendation: 50-150 words

About Assessment-Based Certificates

Assessment-Based Certificates are based on courses or programs that evaluate participants' accomplishment of the intended learning outcomes of the course or program. They only recognize those participants who "meet the performance, proficiency or passing standard for the assessments".

If you describe your badge as an Assessment-Based Certificate, the assessment should be summative and meaningful. If the assessments are merely formative and designed for engagement rather than evaluation, then you should describe your badge as a Participation-Based Certificate.

(Find out more from the [Institute for Credentialing Excellence](#))

Other recommended details:

1. A brief listing of content and desired outcomes
2. What types of assessment are offered (ie. how flexible is the assessment)
3. If assessment can be based on learner-supplied evidence, how that evidence will be evaluated (assessor qualifications, assessment rubric, etc.)
4. "Average learning time", or estimated effort time in hours

Taking care with Criteria will ensure consistent quality for your badges. See also the badge templates for **Participation-Based Certificate**, **Competency Certification** and **Recognition of Other Achievements**.
